

MATCH is the only access to care service solely dedicated to the uninsured and underinsured population in McDowell County, serving over 1,000 people per year!

Mission:

To reduce health disparities for McDowell residents by facilitating access to the services people need to get well, be well, and stay well.

Vision:

MATCH envisions a McDowell County where all people have equitable access to care and resources that they need to be healthy.

Constituency:

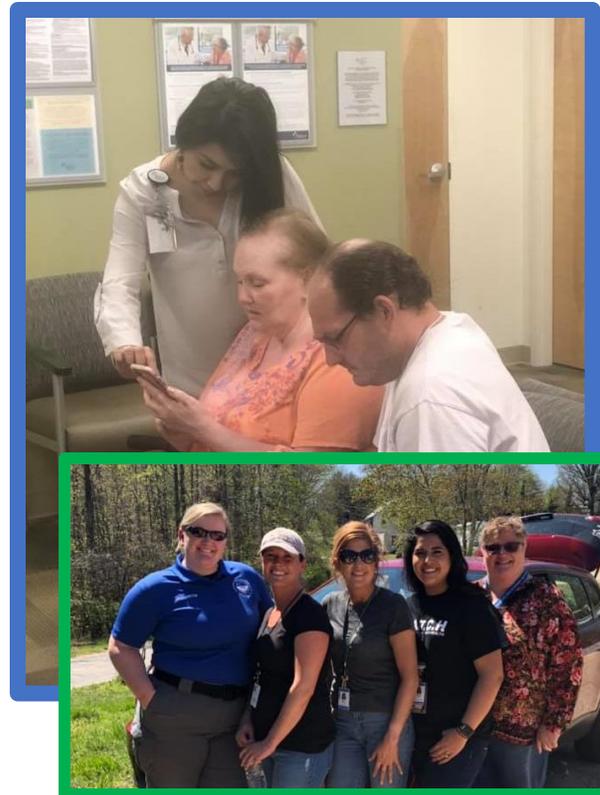

Any McDowell County resident in need of access to health care services, local and regional medical providers, and community agencies.

Values:

MATCH believes in the inherent dignity of every human being and their phenomenal potential when their core needs are met.

MATCH services are provided from a place of empathy, compassion, and integrity, always.

MATCH creates space for all people regardless of gender, race, national origin, religious beliefs, age, marital status, disability, or sexual orientation.

MATCH addresses a critical need in McDowell County for access to whole-person, coordinated care for low income residents. Recognizing that access to care alone does not guarantee a patient's needs are met, MATCH is a uniquely designed model developed to connect patients to additional resources and provide on-going support while enrollees reach their personally-defined goals.

Outcomes of MATCH's work include:

1. Improved individual physical, behavioral, and social health.
2. Decreased number of uninsured people in McDowell County.
3. Decreased Emergency Room utilization through improved preventative care.
4. Strengthened communication channels between medical providers, community agencies, and patients.
